For free of charge Stock Images to use on user dashboards, please refer to our marketing kits for Students and Employers:Â Students -Â

Employers -Â

Â To use your own custom images for dashboard widgets, the best practice for sizing is 600X300, or 2:1 so that the image scales correctly. The lowest possible sizing is 450x225, but anything beyond that will start to lose quality. You can send these to support@gradleaders.comÂ and include configuration details for our team to assist with setup (user dashboard, placement, permission groups and who should see/access the widget, deep links, etc.).Â
