

How can I get the schedules to fill equally?

Article Number: 418 | Rating: Unrated | Last Updated: Jan 4, 2019 at 11:01 AM

The scheduler tries to fill the slots so students aren't conflicted.Â The scheduler does not take into account balancing the schedules.Â Most schools â€œtighten upâ€• the schedules by removing slots before they run the scheduler.Â

For example, if you originally had 16 slots available, but you only have 10 students to schedule, remove 6 slots from the schedules before the scheduler is run.Â This will ensure that the schedules wind up even and starting/ending at the same time.Â
