Problem: What is the difference between Run Schedule and Confirm Schedule? **Likely Cause(s):** n/a
Resolution: When an admin chooses to Run the schedule, the system willÂ put theÂ candidates in the time slots andÂ makes visit not visible.

 When an admin chooses to Confirm the schedule, the system will send emails to students with their timeslot info andÂ makes it visible.

 If auto-confirm setting in control = Yes then â€œrunâ€• does both jobs.

 After a recruiting date is confirmed the first time, the icon changes to â€œre-confirmâ€• so that the adminÂ know thatÂ they have already confirmed the schedule.Â It also allowsÂ the adminÂ to re-send the student emails ifÂ theyÂ need to. **Program Setting:**

 Program> Settings> OCR> Visit -Schedule> Auto-Confirm (Set to yes to have run place candidates in times slots and confirm the schedule.)
