Mock Interview Module

Article Number: 540 | Rating: Unrated | Last Updated: Jan 4, 2019 at 10:20 AM

This module works very much like the Advising module, with a few subtle differences. Â The purpose is to allow the Career Management Office staff to setup and manage the Mock (Practice) Interviews for their students. Â When setting up Mock Interview schedules, the admin user identifies a few pieces of critical information (date, time schedule, room, signup deadlines, etc.). Â As with Advising, there is a copy function to allow the admin user to quickly replicate the interview schedules for various rooms, interviewers, etc. Candidates can browse and sign up/withdraw for available mock interviews up to specified deadlines. Â It is also possible to have the candidates respond to questions as they sign up. Â As an example, many schools ask if the students wish to practice interviews for certain job functions or industries. Â Â The admin users can see the signups in real-time, batch email the people on a particular schedule as needed, and track attendance.
