Question: What is the default sort order for the different modules in the system? **Answer:** The below table show the default sort before any sorting is applied. When Sorting is applied, the last sort is stored in the users session and will last until the user logs out of GradLeaders Career Center. When they log back in, all grids will revert to the default sorting listed below. (Note: These are the standard terms and may vary by school)

Module	Sorted Column	Order
Company File	Name	Â Â Ascending
Job Board / File	Job Posting Date	Â Â Descending
OCR	On-Campus Interview Date	Â Â Descending
