Issue: A recruiter has submitted a job to our school through GradLeaders Career Center but now wants to make it a Multipost job, is this possible? **Resolution:** Unfortunately, once the recruiter submits a job to an individual school and declines the offer to convert the job to Multipost during the setup, they would have to create a Multipost job at the [webstore](#) and remember to deselect the school they initially submitted a job to in the job distribution list; otherwise, they will create a duplicate job posting.
