Issue: I logged in as a candidate and I see that they have offers on file but the offers aren't appearing in the employment reporting widget. Additionally there is no edit link in the widget, why aren't the offers showing?

Resolution: The primary reason job offers don't show in the employment reporting widget â€“ recent offers section is because they are missing an offer date. The recent offers section needs the following criteria in order to display a job offer: Offer Date, Company Name, and Status.
