Question: I've invited candidate A for Visit 1, but when I login as a candidate, nothing shows up in the Visits>invites tab. **Likely Cause(s):** There are a few factors that could be the cause as to why the invite does not show in the Visit>Invites tab: - The Visit is not marked as visible to candidates - The Invite List has not been finalized: Admin<Visit<Invites Tab<Finalize button - Check back 20 minutes later, sometimes it takes up to 20 minutes for the invites to load. **Resolution:** If the points above don't resolve the issue, send in a support ticket with a detailed summary of the issue.
